SKILLS

GENERATIVE AI
OpenAI, Gemini, Claude, LangChain, LLMs, RAG, AI Agents, Multi-Agent Systems, Prompt Engineering, Embeddings, Vector Databases, Function Calling / Tool Use, Chatbots / Conversational AI, Fine-Tuning / Transfer Learning

AI / ML
PyTorch, Scikit-Learn, Hugging Face, NLP, OCR, Multimodal AI

LANGUAGES
Python, Java, C++, JavaScript, SQL

BACKEND
Django, Django REST Framework, Django ORM, REST APIs, JWT Authentication, Authorization & Permissions, Database Design, Backend Architecture

DATABASES
PostgreSQL, MongoDB, SQLite, SQL

INFRASTRUCTURE
Redis, Celery, Docker, Background Jobs, Caching, CI/CD

TOOLS & DEPLOYMENT
Git, GitHub, Postman, Swagger/OpenAPI, Render, Railway, Vercel, AWS

EXPERIENCE

MJCORP ASIA PVT LTD | Full Stack Intern
Jul 2026 – Present | New Delhi, India

- Built Earn By Way, an AI-powered freelance marketplace with a secure escrow platform connecting clients and businesses with verified freelance talent.

PROJECTS

Mentra.AI — AI Career Intelligence Platform

GEMINI, OPENAI, LANGCHAIN, RAG, EMBEDDINGS, VECTOR DATABASES, REACT, NODE.JS, EXPRESS, MONGODB

- Built an AI career platform that analyzes a user's skills against target roles using LLMs (Gemini, OpenAI) to generate personalized roadmaps, learning missions, and interview preparation content.
- Designed RAG pipelines with embeddings and a vector database to ground LLM responses in relevant career data, and built AI agents with prompt engineering and LangChain to orchestrate multi-step skill-gap analysis.
- Developed a Node.js/Express backend integrated with MongoDB to serve the AI pipeline and manage user profiles, roadmaps, and progress tracking.

RouteIQ — AI-Powered Transit Planner

GEMINI, NODE.JS, EXPRESS, LEAFLET, OPENSTREETMAP, GTFS, REACT, VITE

- Integrated Gemini to generate AI-driven route and travel recommendations on top of real-time GTFS transit data and live bus tracking.
- Built a Node.js/Express backend that combines GTFS feeds with real-time data to power route planning, alternative routes, and Server-Sent Events for live journey monitoring and alerts.
- Built interactive maps with Leaflet and OpenStreetMap for live route visualization and tracking.

WorkFlowX — Project Management Backend

DJANGO, DJANGO REST FRAMEWORK, POSTGRESQL, REDIS, CELERY, JWT, DOCKER

- Designed a relational backend architecture (User → Organization → Project → Board → Task → Comment) and built REST APIs with Django REST Framework, JWT authentication, and role-based permissions.
- Added Redis caching and Celery background jobs for asynchronous notification workflows, and containerized and deployed the app with Docker and CI/CD.

ACHIEVEMENTS & LEADERSHIP

- Co-Lead, AI/ML — GeekRoom
- 3rd Place — ARTPARK ProtoDash Challenge, IISc Bangalore
- Winner — Neural.Net (IIIT Hyderabad)
- Semi-Finalist — ET Hackathon
- Phase II / Finalist — RBI HaRBInger 2026
- Kaggle Certification — Intermediate Machine Learning
- IBM Certification — Python for Data Science, AI & Development
- Udemy Certification — Python Django
